PROFESSIONAL EXPERIENCE

Maximus, Inc.

Project Manager, Federal Operations Support Services

May 2024 – Present

- Operationalized enterprise-wide CMMC certification by mapping program artifacts to regulatory controls and implementing versioned data repositories to improve readiness across federal programs.
- Championed department-wide AI and digital transformation initiatives by building secure, compliance-aligned AI solutions, including a SharePoint-integrated chatbot set to be rolled out to 16.5k+ users.
- Coordinated a multi-domain enterprise chatbot development and rollout by aligning data access, Deltek/SAI360 integrations, and security requirements across HR, policy, compliance, and IT stakeholders.
- Authored and maintained 30+ technical manuals, SOPs, and governance artifacts, ensuring consistent alignment with internal controls frameworks and federal compliance standards.
- Led the end-to-end product lifecycle of a web-based PM framework platform, conducting user research, translating insights into UX/UI improvements, facilitating Agile delivery as Scrum Master, and driving launch and stakeholder alignment through go-to-market.
- Drove change management for the adoption of cloud-based project management tools (Jira, Mural), serving as Jira SME to configure workflows, enforce access controls, and align tooling with organizational governance.
- Built and sustained cross-functional partnerships with internal teams, external clients, and subcontractors.

Sanofi S.A.

Project Analyst, Cloud FinOps (Internship)

July 2021 – January 2022

- Performed FinOps cost-benefit analyses across 100+ teams, generating dashboards and predictive models, reducing cloud expenditures by 15%.
- Integrated cloud governance reporting for GCP, AWS, and Azure, automating data pipelines and stakeholder-facing visuals, achieving a 52% adoption rate on a 50% target among business units.
- Created vendor transition documentation and audit-ready assets, coordinating with external product teams to support a seamless financial system overhaul.

Ministry of Electronics & Information Technology, Government of India

Cybersecurity Intern

November 2020 – January 2021

- Engineered an OWASP Top 10-aligned, intentionally vulnerable Django web app, reverse engineering secure defaults to simulate real-world exploit paths for hands-on cybersecurity training.
- Deployed and maintained the platform via GitHub + Heroku for 1 year, attracting 500+ users/visitors and enabling repeatable, self-serve security skill-building.

EDUCATION

George Washington University, *Master of Science in Computer Science* (GPA - 3.9)

Aug 2022 - May 2024

GGSIIP University, *Bachelor of Technology in Computer Science and Eng.* (GPA - 3.85)

Aug 2018 - May 2022

SELECTED PUBLICATIONS & PATENTS

AI-based security protocols for IoT applications: A critical review

[Research Article]

An industry-wide overview of security provisions is provided by categorizing IoT applications into three broad sectors, namely, healthcare, smart grid, and smart city.

Using Convolutional Neural Networks (CNNs) to Mitigate Urban Water Logging

[Patent Article]

A patent under the Australian IPA, UnClog employs CNNs and real-time road-pothole imaging to identify waterlogged areas, aiding authorities with preemptive mitigation.

LEADERSHIP EXPERIENCE

Committee Chair for Career Development, AANHPI ERG, Maximus

- Championed initiatives that empower the 150+ member community by delivering thought leadership and career development sessions in collaboration with organizational leaders.

Founder, Meraki Lab

- Established Meraki lab to build deep learning/AI-based innovative technologies.
- Provided end-to-end services, including roadmap development, stakeholder engagement, and execution, while pursuing a full-time undergraduate degree.
- Negotiated contracts and secured funding packages to expand the company’s project portfolio and client base.
- Visit the company website [here](#).

Technical Lead, Google Developer Student Clubs (DSC)

- Conducted hands-on workshops on AI, deep learning, data science, data analytics, etc., to foster analytical thinking.
- Mentored newbie members and emphasized the importance of teamwork by building collaborative projects.
- Headed the operations team to successfully organize multiple hackathons with 500+ participants across.

Graduate Teaching Assistant, School of Engineering & Applied Science, George Washington University

- Evaluated technical coursework in programming (Python & R), data analysis, and applied analytical methodologies, ensuring timely feedback, academic integrity, and performance tracking support for faculty.

SKILLS

Project Management Tools	Jira, Trello, Smartsheet, Confluence, Mural
Programming	Python, SQL, RStudio, Matlab, Java, C++
Database Systems	Oracle Database, NoSQL
Visualization & Analytics Tools	Tableau, Microsoft Power BI, Apptio Cloudability, Microsoft Excel
Certifications	AWS Cloud Practitioner, IBM Data Science Specialization
