PROFESSIONAL EXPERIENCE

Maximus, Inc.

Associate Project Manager

August 2024 – Present

- Managing Artificial Intelligence (AI) projects, overseeing execution, assessing feasibility, refining strategies, and driving adoption aligned with business needs.
- Leading department-wide AI tool introduction by conducting data security research, building presentations, and training teams on leveraging AI to enhance operational efficiency and project outcomes.
- Authoring and maintaining software development manuals and technical documentation and refining standardization tools and methodologies to align development with best practices and government contracting requirements.
- Conducting user research for product design, translating insights into actionable recommendations, and conceptualizing user-friendly website layouts and interfaces.
- Supporting federal cybersecurity certification efforts by developing documentation and participating in regulatory initiatives.
- Acting as the primary IT contact by managing the team's JIRA instance, ensuring proper functionality, access control, and alignment with Maximus software governance.
- Acting as Scrum Master for a web development project, facilitating sprint planning, stand-up meetings, and stakeholder reviews to ensure timely delivery and cross-functional collaboration.
- Facilitating effective communication and relationship management with internal teams, external clients, subcontractors, and cross-functional stakeholders.

Project Management Intern

May 2024 – August 2024

- Drove successful change management initiatives during introduction of new cloud-based project management tools (Jira, Mural, etc.).
- Developed and managed client-facing SharePoint sites and technical documentation to centralize informational material for organization-wide risk management procedures.

Sanofi S.A.

Project Analyst Intern - Financial Operations (FinOps) Enhancement

July 2021 – January 2022

- Reduced cloud costs across 110 internal teams through cost-benefit analysis and predictive modeling to generate optimization recommendations.
- Built intuitive financial operations (FinOps) data dashboards using advanced Excel and PowerBI integrating large-scale cloud usage data (GCP, Azure, and AWS).
- Presented monthly cost-saving dashboards to internal project and program managers resulting in a 52% adoption rate on a 50% target of recommendations.
- Led change management initiatives by meeting with external product teams and developing proof of concept and technical documentation for data collection and dashboarding strategies during a major vendor switch.

MetFlux Research

Computer Vision Research Intern

June 2021 – August 2021

- Reduced computational overhead by 30% during the successful translation of research-based computer vision algorithms into lightweight app-integrable solutions for vitals (SpO2, heart rate) detection from facial and fingertip video feed (plethysmography) using Python.
- Obtained a mean detection error of 2% by analyzing and fine-tuning performance markers for vitals detection algorithms.
- Worked with a team of interns to establish a video data repository by collecting and meticulously organizing video samples, facilitating seamless patient record linkage.

EDUCATION

George Washington University, Master of Science in Computer Science (GPA - 3.9)	<u>Aug 2022 - May 2024</u>
GGSIIP University, Bachelor of Technology in Computer Science and Eng. (GPA - 3.85)	<u>Aug 2018 - May 2022</u>

SELECTED PUBLICATIONS & PATENTS

Analysis of User Inclination in Movie Posters Based on Color Bias

[Research Article]

Awarded the Best Article Award in Machine Learning at the IEMIS Conference, the outlined research aids neuromarketing applications by empirically confirming visual bias and introducing a method to quantify it using neural style transfer.

Using Convolutional Neural Networks (CNNs) to Mitigate Urban Water Logging

[Patent Article]

A patent under the Australian IPA, UnClog employs CNNs and real-time road-pothole imaging to identify waterlogged areas, aiding authorities with preemptive mitigation.

LEADERSHIP EXPERIENCE

Founder, Meraki Lab

- Founded Meraki, a sole proprietorship focused on building AI-based solutions in June 2020.
- Provided end-to-end services including roadmap development, stakeholder engagement, and execution while pursuing a full-time undergraduate degree.
- Negotiated contracts and secured funding packages to expand the company's project portfolio and client base.
- Actively oversaw daily operations, managed cross-functional workflows, and handled delivery from June 2020 to June 2022.
- Built and maintained strategic partnerships, ensuring sustainable growth and client satisfaction.
- Visit the company website [here](#).

Technical Lead, Google Developer Student Clubs (DSC)

- Served as the technical lead of the Google DSC chapter at my college from August 2020 to July 2021.
- Planned inter-societal events and conducted hands-on workshops on AI, deep learning, data science, etc. to foster analytical thinking.
- Mentored newbie members and emphasized the importance of teamwork by building collaborative projects.
- Headed the operations team to successfully organize multiple hackathons with 500+ participants.

Graduate Teaching Assistant, School of Engineering & Applied science, George Washington University

- Worked as the grader for the graduate-level Introduction to Big Data and Analytics course (CSCI 6444) during fall 2023 and spring 2024 semesters.
- Evaluated technical coursework in programming (Python & R), data analysis and applied analytical methodologies, ensuring timely feedback, academic integrity, and performance tracking support for faculty.

SKILLS

Project Management Tools	Jira, Trello, Smartsheet, Confluence, Mural
Programming	Python, SQL, RStudio, Matlab, Java, C++
Database Systems	Oracle Database, NoSQL
Visualization & Analytics Tools	Tableau, Microsoft Power BI, Apptio Cloudability, Microsoft Excel
Certifications	AWS Cloud Practitioner, IBM Data Science Specialization
